Programming Fundamentals Lab

Lab Task # 02
Scratch (advanced)
Instructor: Fariba Laiq
Email: fariba.laiq@nu.edu.pk
Course Code: CL1002
Semester Fall 2022

Department of Computer Science,

National University of Computer and Emerging Sciences FAST

Peshawar Campus

Task 1:

Add a sprite cat and letters of your name. The cat will move towards each letter one by one and when it touches a letter, the letter animates i-e the letter increases its size for a second and then resets to its initial size. You can also insert a sound when the cat touches a letter.

Below is a short clip for reference.

Task 2

Use Text to Speech extension and make a conversation between two sprites. Think and make a logic through which the sprites will say (through say bubble) and speak at the same time. Also, you can animate the characters during a conversation.

Submission

You have to submit the scratch files on google classroom.
